DETAILED ACTION

Election/Restrictions

1. Claims 1-2 and 4-9 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claim 3, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, is now subject to being rejoined. Claim 3 hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on September 24, 2002 is hereby withdrawn.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with June 24, 2004 on William Solomon.

The application has been amended as follows:

In claim 3, line 4, after "0.3 m²/g to 3.0 m²/g" insert --prior to firing--.

4. Claims 1-9 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Based upon the data in Figure 3 and in light of Applicant's arguments with a subsequent review of the cited prior art, the 35 U.S.C. 103 rejections of claims 1-2 and 4-6 are withdrawn. The prior art of record do not teach or suggest the combination of the specific surface area of the silver particle with the temperature dependence of firing the conductor paste at a temperature having a difference $\pm 50^{\circ}\text{C}$ from a softening temperature of the glass in the glass ceramic board as presently claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
